

CEA/Grenoble Postdoctoral Research Position Available (Experimental physics)

A postdoctoral position is foreseen starting in 2007 at the Service de Physique Statistique, Magnétisme et Supraconductivité (CEA/DRFMC, Grenoble, France) for an individual interested in understanding the physical properties of geometrically frustrated magnetic materials. The work will involve specific heat, positive muon spin relaxation and neutron scattering experimental techniques performed on single crystals down to at least 100 mK. Previous experience with at least one of this technique is desired. A short description of the group activities is available at

http://www-drmmc.cea.fr/Images/Pisp/pdalmas/frustration_general.html

Send before 31st march 2006, application letter, resume and 3 letters of reference to

Alain Yaouanc, CEA/DRFMC/SPSMS, 38054 Grenoble, France;
